

# Status Report

## ReqRes-API

09/02/2022

The cases were prepared according to the rules and methods provided in the API: <https://reqres.in/api>

16 test cases were created to cover the methods laid out in the API. Being 3 for the Resource part, 2 for Login, 9 for User methods and 2 for the Register part.

The automated testing project can be found at the following link: <https://github.com/hiagonfs/ReqRes-API-RestAssured>

To run the project it is necessary to have the dependencies that are described in the README. The forms of execution are also described there.

During execution all tests passed successfully, no bugs were recorded.
